

IMMANUEL TAMPUBOLON

FULL-STACK DEVELOPER | COMPUTER TECHNOLOGY STUDENT

Sigumpar, Sumatera Utara 22380 ♦ +62 853-5848-5016 ♦ immanueltampubolon594@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Technology (D3) student at Institut Teknologi Del with hands-on experience designing, building, and deploying six production-ready full-stack web applications using React, Next.js, Laravel, Node.js, and FastAPI, with database work spanning MySQL, MongoDB, and PostgreSQL (via Supabase), and deployment experience with Docker and cloud platforms. Built an AI-powered Retrieval-Augmented Generation (RAG) chatbot from scratch as a thesis project, leveraging LangChain, vector databases, and evaluation frameworks (RAGAS, Langfuse). Open to Full-Time, Contract, and Freelance Software Engineering opportunities, bringing cross-stack range and a strong ownership mindset to production teams.

WEBSITES, PORTFOLIOS, PROFILES

- Portfolio — portfolio-gamma-blush-68.vercel.app
- linkedin.com/in/immanuel-tampubolon-124849415
- github.com/immanueltampubolon594

SKILLS

Languages: Python, TypeScript, JavaScript, PHP | Familiar: Java, Go, C/C++
Frontend: React, Next.js, Tailwind CSS, Component Architecture, State Management
Backend: FastAPI, Node.js, Laravel | **Database:** MySQL, MongoDB, Supabase (pgvector) | **DevOps:** Docker, Nginx, Ubuntu Server, Vercel | **Tools:** Postman
AI Engineering: LangChain, Cohere Embeddings, Gemini API, RAGAS, Langfuse
Developer Tools: Git, GitHub

ORGANIZATIONAL EXPERIENCE

Himpunan Teknologi Komputer, Institut Teknologi Del — Facilities & Infrastructure Division 2025 – Current
• Coordinate facility and equipment logistics for department events and student activities, supporting program operations for the Computer Technology study program.

EDUCATION

Associate of Applied Science — Institut Teknologi Del — Teknologi Komputer 2024 – Present
Laguboti, North Sumatra, Indonesia
Coursework focus: Software Development, Computer Networking, Embedded Systems.

TECHNICAL PROJECTS

- CyberGuard AI — RAG-based cybersecurity chatbot (Thesis Project) built with Next.js, FastAPI, LangChain, Cohere embeddings, and Supabase pgvector, with RAGAS and Langfuse for evaluation.
- Connect+ (Campus Connect) — 5-service microservices campus management platform built with React, MongoDB, Docker, Nginx, and Ubuntu Server.
- Neo-Vanguard — Digital education platform for AI literacy and cybersecurity awareness, built with React, TypeScript, Tailwind CSS, and Vercel.
- SiPerpus — Laravel-based library management system featuring catalog, member, borrowing, and inventory management with Tailwind CSS.
- Tanah Batak — Batak cultural heritage website with user authentication, built with React, TypeScript, Golang, and Vite.
- UNTHOPEDINE — Responsive coffee shop website with HTML, CSS, JavaScript, and WhatsApp ordering integration.
